

Dear colleagues,

This is a second invitation to submit proposals for paper presentation to the participants which will convene at the West African Biofuels Summit 2008 in Abuja, Nigeria, to be held from April 22-24 2008.

Please find below a short outline of the Summit. Issues to be addressed are still tentative and may be extended depending on your contributions.

Suggestions for further topics to be included are welcome.

- Biofuels Market Development

-Policy & Taxation

-Legal issue

- Biofuels Sustainability

-Feedstock

-Technology

- Biofuels Finance

-Food Vs Fuel

-Case Studies

If you would like to participate in this Summit and present a paper, please submit a one-page abstract to jakolgate@gmail.com no later than 31 January 2008.

Meanwhile, we have received an expression of interest by the editors of Cambridge Scholar Publishing to publish a selection of high-quality papers presented in this forthcoming Summit as a special issue. I believe this will be an additional incentive to propose an excellent contribution to the Summit.

Please note that conference registration, sponsorship, exhibition as well as information on hotels, travel, etc., is being provided by the website that is being maintained by the local arrangements committee.

The URL for that website is: <http://www.westafricabiofuels.net/> (still under construction)

Please do confirm your participation and interest to make presentation.

We look forward to hear from you soon.

Regards
